

Shaping the Future
Extension Education in Natural Resources
& Environmental Management

The quality of our environment - the air we breathe, the water we drink, the natural resources we require - is important to everyone. The Campbell County Cooperative Extension Service's Natural Resources and Environmental Management (NREM) program educates a diverse people to make decisions and take action to improve the quality, productivity, and sustainability of natural resources. NREM programs focus on soil, water, air plant and animal life, forests, aquatic and other ecosystems. The Extension office provides a front door to the research-based expertise of state universities nationwide and can do more than ever to help people understand and act on environmental concerns. Contact DJ. Scully, Campbell County Extension Agent for Natural Resources and Environmental Management, if you are a citizen, consumer, educator, landowner, professional, or youth to find out how we can assist you.
